PEOPLE RECEIVED PERMANENT
HOUSING AND MENTAL HEALTH SERVICES
FROM MIRCI SINCE JANUARY 1997

After 1 year of enrollment with MIRCI:

- Inpatient hospitalizations dropped 57%
- Inpatient charges dropped almost 5 million dollars
- When hospitalization was required the length of stay was reduced by 45%
- Emergency department (ED) visits dropped by 45%

By receiving mental health services from MIRCI, individuals reduced visits to local hospitals for mental health treatments.

- Visits to the emergency department for mental illness or substance abuse were reduced by 63%
- Psychiatric hospitalizations were reduced by 90%
- Emergency department (ED) charges for mental illness or substance abuse were reduced by 76%

ED VISITS FOR INJURIES WERE REDUCED BY 43%
